Career Objective

As an aspiring React.js Frontend Developer, I bring a solid foundation in web development through hands-on training. Eager to apply my skills in a dynamic team environment, I am seeking an entry-level position to contribute to innovative projects and further develop my expertise in building modern, user-friendly interfaces.

Skills

Expertise: HTML5 | CSS3 | JavaScript | REST API | ReactJS | Git | Firebase | Tailwind CSS

Comfortable: NodeJS | ExpressJS | MongoDB | JWT

Projects

MealNest Hub - Hostel Food Management Website

[Preview](#) [Github](#)

Feature:

- Student can explore and request meals based on categories like breakfast, lunch, and dinner.
- A membership system with different packages allows users to upgrade for additional benefits.
- The system allows admin to manage users, including making them admins and handling user subscriptions.
- This website is built using the MERN stack, with additional technologies for features like dynamic tabs, private routes, and secure application processing.

Technology: HTML5 | CSS3 | JavaScript | ReactJS | Firebase | Tailwind CSS | MongoDB | ExpressJS

Jobs Hub - Job Seeking Website

[Preview](#) [Github](#)

Feature:

- Easily navigate and discover jobs in On-Site, Remote, Hybrid, and Part-Time categories, streamlining the user's job search experience.
- Accessible dashboards empower users to manage applied, added, and posted jobs seamlessly, enhancing user interaction and job tracking.
- Grab attention with visually rich job listings, highlighting key details for quick insights into company, title, date, salary, and application deadlines.

Technology: HTML5 | CSS3 | JavaScript | ReactJS | Firebase | Tailwind CSS | MongoDB | ExpressJS

Event Management - Event Management Website

[Preview](#) [Github](#)

Feature:

- Detailed information about various event services offered, including images, pricing, and descriptions.
- Secure email and password-based authentication for clients to create accounts and access personalized features.
- Ensured responsiveness across devices, allowing clients to access the website seamlessly on desktops, tablets, and smartphones.
- To create event management website I used React, Firebase for authentication and data storage, and React Router for navigation, focusing on user-friendly design and secure authentication

Technology: HTML5 | CSS3 | JavaScript | ReactJS | Firebase | Tailwind CSS
