

# JAHID HOSSAN

## Frontend Developer

+966 538171094    @pro.jahidhossan@gmail.com

### SUMMARY

Passionate Frontend Developer with a knack for creating intuitive and high-performing web applications. Passionate about creating visually appealing and user-friendly interfaces that enhance the user experience. In my free time, I enjoy experimenting with new design trends and exploring the latest web development tools.

### PROJECTS

#### MealNest Hub

##### Hostel Food Management Website

🔗 <https://github.com/Jahid-Hossan/MealNest-client-site>

[Live Preview](#)

Time Period: 4 Days

##### Features:

- Student can explore and request meals based on categories like breakfast, lunch, and dinner.
- A membership system with different packages allows users to upgrade for additional benefits.
- The system allows admin to manage users, including making them admins and handling user subscriptions.
- This website is built using the MERN stack, with additional technologies for features like dynamic tabs, private routes, and secure application processing.

#### Jobs Hub

##### Job Seeking Website

🔗 <https://github.com/Jahid-Hossan/jobs-hub-client-site>

[Live Preview](#)

Time Period: 3 Days

##### Features:

- Easily navigate and discover jobs in On-Site, Remote, Hybrid, and Part-Time categories, streamlining the user's job search experience.
- Accessible dashboards empower users to manage applied, added, and posted jobs seamlessly, enhancing user interaction and job tracking.
- Grab attention with visually rich job listings, highlighting key details for quick insights into company, title, date, salary, and application deadlines.
- I used React, React Router, React-Hook-Form, Stripe API, React Tabs, Infinite Scroll, React-Query for efficient MERN stack development.

#### Event Management

##### Event Management Website

🔗 <https://github.com/Jahid-Hossan/event-management-web>

[Live Preview](#)

Time Period: 2 Days

##### Features:

- Detailed information about various event services offered, including images, pricing, and descriptions.
- Secure email and password-based authentication for clients to create accounts and access personalized features.
- Ensured responsiveness across devices, allowing clients to access the website seamlessly on desktops, tablets, and smartphones.
- To create event management website I used React, Firebase for authentication and data storage, and React Router for navigation, focusing on user-friendly design and secure authentication.
